

# Homework Week 8

By: Sasha Barrett-Garnier

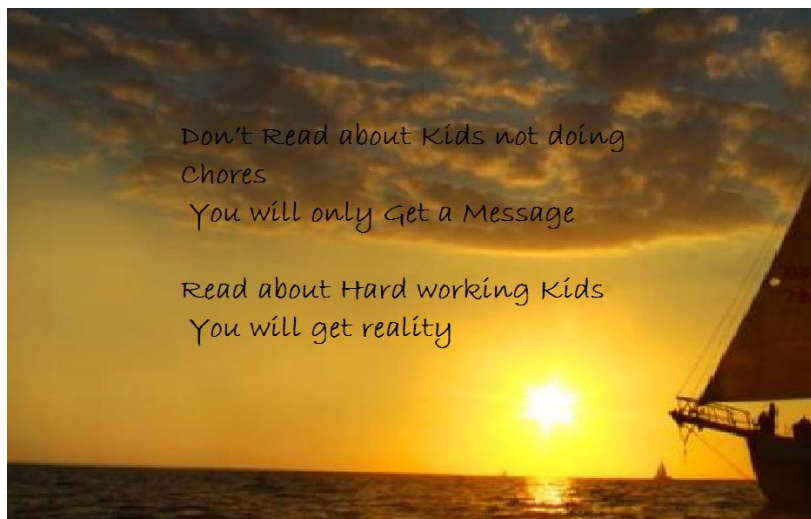

1. How has your increased contribution to the household chores affected your family dynamics?
2. My increased contribution to the household chores has affected my family greatly, because the jobs were just done with no argument, or having to ask. I normally do a lot of jobs around the house but by me doing extra jobs, I have to say the house ran smoother. Even though I believe my parents didn't really notice the jobs being done they just have more time to relax.

3. Self-assessment: How has this contract affected you personally; both positively and negatively?
4. This contract has affected me positively and negatively. Positively, it has affected me positively because I can now see how much smoother our household would run if we just pitched in that extra bit. Doing more chores has taught me actually how hard our parent's lives are. Negatively, it hasn't really affected me negatively because it was a positive experience that made us find out how hard keeping a household up and running is.

5. Interview family members and ask for feedback on how has this affected them?
6. Have your parents/caregivers noticed a change in the household's daily routines?

Emma: With Sasha doing extra jobs the household ran smoother, and it was less that Oscar and I had to do, so we had more time to focus on study.

7. My Parents have noticed a little differences, but I believe if everyone just pitched in a little more like I did it would be more noticeable.

My Moral
